Kathy Finch MD - She is recognized as a DAN physician and is going to be accepting several different insurance policies. She can be reached at 244-0640. www.adulthealthcare.net

Understand shooting underwater digital photos. Learn how to use your camera and strobe. We have a photography class every month.

Remember if you get your camera here; the tuition for the class will be 30% off, and the photography special counts towards becoming a Master Diver.

Captain Si's Pirate Corner:

The Jolly boat:

The Jolly boat , which is an open rowing boat, is a usefull piece of equipment. As well as for chasing pirates through the shallows, it may be used to ferry passengers and cargo to and from the shore, or to make an attack on a pirate ship at anchor.

Tech XR Class: (Not just for Techies, Great for recreational divers too!)

As we know the words “Tech” & “Extended Range” come with visions of excessive equipment and training. How can the recreational diver benefit from this advanced training without the excessive training and equipment? Increase your bottom time and safety all at the same time.

Xtreme Excitement

SSI's TechXR is a well founded Technical Diving program and it was created to take the recreational diver to an extreme level for their diving adventures.

Whether you are looking for the excitement of deep reef diving or the thrill of exploring wrecks located well past 40m (130 feet), SSI TechXR is a way to learn the training and experience necessary for you to complete every new adventure with confidence and skill.

Whatever your current diving ability, extended range diving will challenge you with environments, depths, bottom times, procedures, and equipment not commonly encountered by recreational divers. You will be experiencing advanced levels that require extensive knowledge, enhanced diving skills, and considerable experience.

Advanced Nitrox: All you need is 24 dives (6 of them Nitrox).

- Increase your understanding of diving physics, physiology, and decompression theory
- Select and configure the diving equipment system that is best for you
- Get an introduction to advanced dive planning and gas management procedures
- Select an optimized gas blend and minimize potential decompression obligation.
- Be introduced to the use of decompression gasses.
