Captain Si's Pirate Corner:

A Bounteous Prize

The largest galleons were built by the Spaniards to carry gold and silver across the Atlantic. Sometimes an entire year's production would be crammed aboard a single vessel. When Drake captured the galleon Cacafuego, it took his crew six days to transfer all the treasure to the hold of Golden Hinde.

Stay tuned for more next month...argh!!!

Extended Range Diving:

As we know the words “Tech” & “Extended Range” come with visions of excessive equipment and training. How can the recreational diver benefit from this advanced training without the excessive equipment, increase your bottom time and safety all at the same time?

Extreme Excitement

SSI’s Extended Range is a well founded Diving program and it was created to take the recreational diver to an extreme level for their diving adventures.

Whether you are looking for the excitement of deep reef diving or the thrill of exploring wrecks located well past 40m (130 feet), SSI’s Extended Range is a way to learn the training and experience necessary for you to complete every new adventure with confidence and skill.

Whatever your current diving ability, extended range diving will challenge you with environments, depths, bottom times, procedures, and equipment not commonly encountered by recreational divers. You will be experiencing advanced levels that require extensive knowledge, enhanced diving skills, and considerable experience.

Advanced Nitrox: All you need is 24 dives (6 of them Nitrox).

- Increase your understanding of diving physics, physiology, and decompression theory
- Select and configure the diving equipment system that is best for you
- Get an introduction to advanced dive planning and gas management procedures
- Select an optimized gas blend and minimize potential decompression obligation.
- Be introduced to the use of decompression gasses.

Travel Tip

When planning any trip, look beyond the pretty pictures in your tourist brochures for background on how your destination's demographic makeup may be causing problems today or tomorrow. If you're planning a trip, start articles and surfing the Web a few months in advance to gather political news on what's happening (information you'll seldom find in guidebooks)..
